Homework No. 3

Prepare an Excel Sheet to compute the Reimann sum for the following functions.

1. $f(x) = x^2$
2. $f(x) = e^{-x}$

Don’t use the first two columns as these columns will be used to provide inputs. You can use Columns C and all columns onward.

Generate 100000 rows (serial number) and next to these rows compute the Left and Right Reimann Sums in two separate columns. Give proper column headings.

Submission Deadline:

Mechanical Engineering Section A: November 5, 2026 before 11:00 PM.
Mechanical Engineering Section B: November 3, 2026 before 11:00 PM.
Computer Science: November 3, 2026 before 11:00 PM.

CR Responsibility:

Collect excel files from all the students, zip the files and send to the following email address.
`aamir@pnec.nust.edu.pk`

Student Responsibilities:

1. Name the files as your student ID.
2. Don’t copy and paste because such problems may appear in other assessments of this course.
